HANS GROHE – design by Phillippe Starck

Starck Organic  
Soft shapes and many advantages.

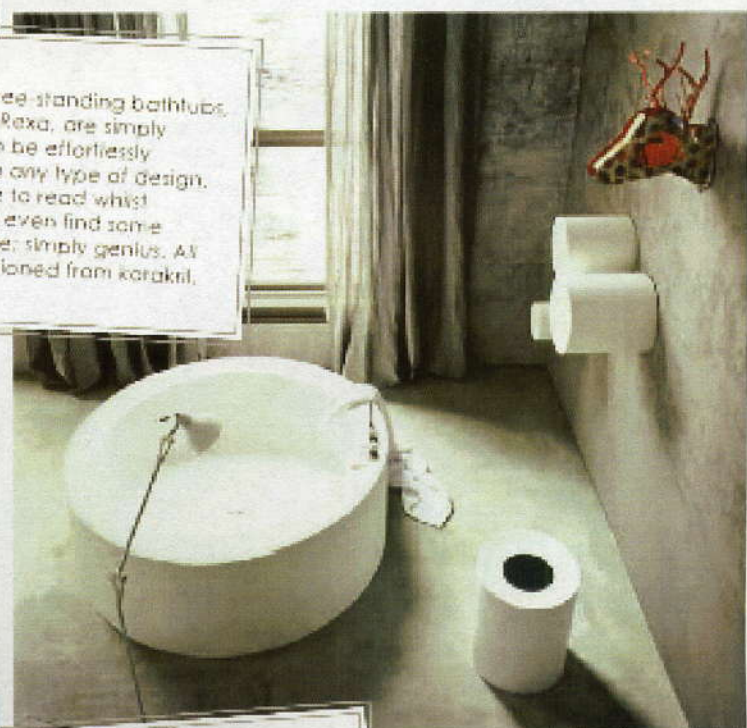

Axar Starck Organic is a collection that appeals to heart and intellect in equal measure: the organic minimalist design is bursting with sensuality and energy, which runs throughout the entire collection, from the washbasin mixers to the accessories. The new mixer showerjet guarantees a sensual water experience and is economical in terms of consumption, while the control concept of the washbasin mixers ensures that water is used responsibly; the ergonomics are also impressive. In addition to the collection's functional and ecological advantages, it can also be combined in versatile ways: Axar Starck Organic blends harmoniously into different ambiances.

**REXA**

These beautiful free-standing bathtubs, brought to us by REXA, are simply stunning and can be effortlessly incorporated into any type of design. For those who like to read whilst relaxing, you can even find some with books storage: simply genius. All elements are fashioned from korakri.

**LIEBHERR**

This is a great idea for helping creams last longer, especially in the hot weather we enjoy on the Coast: Liebherr's CMes 502 is the innovative appliance for making your refrigerated storage requirements truly convenient – even in your bathroom.

**RIFRA**

Also designed by RIFRA is this cosy NEST bathtub. The attention to material and finishes has resulted in an extremely simplistic, clean, free-standing look with the high function of a luxury bathtub. The versatile nature of the bath and top free up potential moving and grooming space.
